# Symantec dlp installation guide linux

Symantec dlp 15.5 installation guide linux. Symantec dlp 15.8 installation guide linux.

| NetworkNetworkConnector | Message : Failed to Query BFE service status. 3.3 Create the database listener. Decide DLP Installation Tiers Symantec DLP Architecture Overview 2.1 Singer Tier To implement the single-tier installation, you install the database, the Enforce Server, and a detection server all on the same computer. | NetworkNetworkConnector | Message : Failed to start BFE service, network connector will not start. Video demonstrations show how to install and configure the Oracle database, deploy a Cloud Service for Email cloud detector, configure SaaS email to work with Cloud Service for Email, and deploy a Symantec DLP virtual appliance. The product covers a variety of areas, including endpoint data in use, network data in transit, and files and databases at rest. I were working on Symantec DLP project and had some experience with it. Double click the service. Install Endpoint DLP Agent 6.1 Downloading Endpoint DLP Agent How Endpoint DLP works? On the general tab change the startup type to automatic. In addition, manual attempts to start the services fail with a permissions violation.Set the Startup type for the "Base Filtering Engine" service to "Automatic" and start it.Go to Control Pane > System and Security > Administrative Tools > Computer Management > Services. Symantec DLP 15.5 File Connect Download Page Also, please read "Symantec Data Loss Prevention System Requirements and Compatibility Guide Version 15.5. Last updated 5 April 2019" to make sure you meet those prerequisites. You're Reading a Free Preview Pages 126 to 138 are not shown in this preview. Add To Watch List Request In Your Area Request Private Class View PDF The Symantec Data Loss Prevention 15.5 Planning and Implementation course provides a basic introduction to Symantec Data Loss Prevention (DLP) architecture, discusses important design considerations for planning a Symantec DLP implementation, and guides you through the processes of installing the Symantec DLP Oracle database and the various server and agent components of Symantec DLP. 3. Symantec Data Loss Prevention addresses on-premises, mobile and cloud data and can be deployed on both physical servers -- Windows Server, Red Hat Enterprise Linux and others -- and cloud infrastructures, such as AWS. Download Installation Files from Symantec File Connect You will need a Serial Number to download all DLP related software from Symantec File Connect web site : After you log in, you can choose the product and version you want to install. Install Oracle DB 3.1 Install Oracle 12c SE2. You're Reading a Free Preview Page 44 is not shown in this preview. You're Reading a Free Preview Pages 89 to 103 are not shown in this preview. 4. You must have a working knowledge of Windows server-class operating systems and commands, as well as networking and network security concepts. 3.5 Create the Symantec Data Loss Prevention database user. 2.3 Three-Tier To implement the three-tier installation, you install the Oracle database, the Enforce Server, and a detection server on separate computers. You're Reading a Free Preview Pages 66 to 67 are not shown in this preview. This post is going to review what I have been done and how I managed to install it in my home lab environment. Configure Policy and Response Rule 8. You then install detection servers on separate computers. You're Reading a Free Preview Pages 16 to 21 are not shown in this preview. You're Reading a Free Preview Pages 30 to 37 are not shown in this preview. The Symantec Data Loss Prevention suite is designed to meets the needs of large enterprises, as well as small and medium-sized enterprises. Without it, neither EDPA nor WDP services can start.For a new install of the Endpoint Agent, the Install.log may not indicate any problems because BFE status is not checked during the installation.After a successful installation, both the EDPA and WDP services default to the "Automatic" start mode and are running. 2.2 Two-Tier To implement the two-tier installation, you install the Oracle database and the Enforce Server on the same computer. 3.2 Create the Symantec Data Loss Prevention database. 1. You're Reading a Free Preview Pages 71 to 82 are not shown in this preview. This course is intended for anyone responsible for planning a Symantec DLP implementation and installing Symantec DLP components Understanding Symantec Data Loss Prevention Architecture Design Considerations for Implementing Symantec Data Loss Prevention Installing Symantec DLP Course Review You're Reading a Free Preview Pages 7 to 12 are not shown in this preview. 3.4 Configure the local net service name. Without BFE, both services default to the "Manual" start mode. Symantec recommends implementing the three-tier installation architecture as it enables your database administration team to control the database. The "Manual" start mode prevents the DLP network drivers from working. In my lab, I choose Two-Tier for my testing since it can distribute computer resources into different machines also make installation easier than three-tier. Command line to start and stop both DLP agent services: sc start edpa && sc start wdp sc stop edpa && sc stop wdp Troubleshooting: The EDPA and WDP services fail to start.Manual attempts to start the services results in an access denied error. But I recorded my screen with what I have done and what kind of issues I have met , and how I resolved it. All are in those YouTube videos for future references, which will be helpful if you have same lab project for Symantec DLP products. The "Base Filtering Engine" (BFE) Service must be running for the DLP agent tofunction. 6.2 Unzip Agent to local folder 6.3 Run the DLP Agent installer batch file 6.4 Confirm that the agent is running 7. Install Detection Servers 5.1 Installing the Java Runtime Environment on a detection server 5.2 Installing a detection server : Network Monitor, Network Discover, Network Prevent for Email, Network Prevent for Web, and the Endpoint Prevent and Endpoint Discover detection servers 5.3 Verifying a detection server installation 5.4 Registering a detection server 6. You're Reading a Free Preview Pages 48 to 62 are not shown in this preview. Discovery How Storage DLP works? References: Appendices: Symantec ATP (EDR) Appliance 8880 Rear View You're Reading a Free Preview Pages 110 to 114 are not shown in this preview. Install Enforce Server 4.1 Installing the Java Runtime Environment on the Enforce Server 4.2 Installing an Enforce Server 4.3 Verifying an Enforce Server installation 4.4 Installing a new license file ( note: License will not restrict in those numbers you bought) 4.5 Importing a solution pack 5. Typically, this installation is implemented when an organization, or the group responsible for data loss prevention, does not have a separate database administration team. You're Reading a Free Preview Pages 118 to 122 are not shown in this preview. It mostly high level lists all related steps. Symantec\_DLP\_15.5\_System\_Requirements\_Guide.pdf (819.4 KB) 2. Hands-on labs include exercises for installing the Enforce Server, a Detection Server, an OCR Server, and an Endpoint Agent, and then testing the Symantec DLP environment to verify it can detect policy violations and create incidents. It will not be alike a step by step installation tutorial since Symantec documents have explained details enough. Typically, this installation is implemented for testing purposes.
